

MORE SENSORY ACTIVITIES

CANDY HEART OOBLECK

Try this incredible sensory play recipe for kids who love to dig in and explore with their sense of touch.

SENSORY BOTTLE

This has to be the quickest! The simplest! The cheapest glitter sensory bottle you can make.

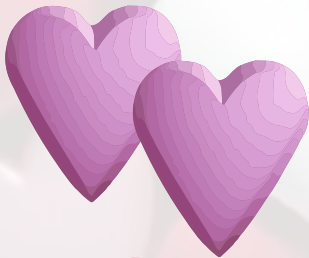

BUBBLY SLIME

This is a great combination of all things chemistry with slime making and a fizzy chemical reaction.

VALENTINE PLAYDOUGH

Quick and easy homemade Valentines playdough with our favorite no-cook playdough recipe!

FAIRY DOUGH

This fairy dough is ultra-soft and smooth for the perfect sensory experience.

EDIBLE PLAYDOUGH

This powdered sugar playdough with only 2 ingredients couldn't be easier!

VALENTINE BUBBLES

Our bubble Valentines activity is perfect for exploring science through play.

VALENTINE'S POTIONS

This Valentine's Day baking soda and vinegar experiment is perfect for exploring states of matter and chemical reactions

VALENTINE'S

SENSORY PLAY

Simple to make and inexpensive, these Valentine sensory bins make for fun hands-on February sensory activities to do with young kids.

Wondering what to put in a Valentine sensory bin? Here are a few ideas.

Heart Hunt Bin: Materials: Red, pink, white rice or dried beans, heart-shaped containers, heart-shaped acrylic gems. Hide small heart-shaped objects in the bin for kids to find using their hands or small scoops.

Love Letter Bin: Materials: Shredded red and pink paper, heart-shaped envelopes, Valentine and heart stickers, and small paper cards. Kids can explore the shredded paper and use the envelopes for pretend play and fine motor skills.

Candy Shop Sensory Bin: Materials: Pink, natural, and/or red playdough, heart-shaped cookie cutters, plastic toy cupcakes or other fake food sweets, and candy molds.

Rose Petal Bin: Materials: Silk or fabric rose petals, small flower pots, gardening tools, and fake flowers. You can fill a bin with fake flower petals and larger fake flowers.

Valentine's Bakery Bin: Materials: Red, pink, and white play dough, heart-shaped cookie cutters, rolling pins, and small baking tools. Silicone heart molds. Children can engage in pretend baking activities, molding heart-shaped cookies and cupcakes.

Chocolate Factory Bin: Materials: Brown kinetic sand, heart-shaped chocolate molds, plastic utensils, and small containers. Kids can pretend to be chocolatiers, molding and creating chocolate treats.

Love Potion Mixing Bin: Materials: Colored water (red and pink), heart-shaped ice cubes, plastic bottles, squirt bottles, and funnels. Children can mix "love potions" by pouring and transferring colored water into containers.

Cupid's Arrow Bin: Materials: Paper cupids, feathers, heart-shaped beads, and pipe cleaners. Encourage fine motor skills by letting children create their own Cupid's arrows.

Valentine's Day Sensory Soup: Materials: Water, heart-shaped containers, acrylic hearts, heart-shaped sponges, and ladles. Kids can pretend to cook Valentine's Day-themed soup, stirring and serving with the ladles.

Pom Pom Sorting Bin: Materials: Pom poms in red, pink, and purple! Small container and tongs. Kids can explore the texture of the pom poms and practice fine motor skills sorting pompoms.
